U. S. PATENT DOCUMENTS

A graph on a grid showing two intersecting lines. The horizontal axis (x-axis) and vertical axis (y-axis) are both labeled from 0 to 10. The grid lines are spaced at intervals of 1 unit. One line, representing the equation $y = x + 1$, has a positive slope and passes through points such as (0, 1), (5, 6), and (9, 10). The other line, representing the equation $y = -x + 11$, has a negative slope and passes through points such as (0, 11), (5, 6), and (10, 1). The two lines intersect at the point (5, 6).
